

Stable DRM4G Release 2.6.1

This release makes some small improvements over the previous release.

- [?Download](#)

Release notes

New features

- Now you have access to the VM contextualisation file and you can specify an alternative file for the DRM4G to use (ticket [#6037](#))
- The `drm4g` command options have been expanded (ticket [#6059](#))

Resolved issues

- When using OpenSSH as the communicator the DRM4G will attempt to delete the unused socket directory (ticket [#6006](#))
- Any mention of the function "`checkOutLock`" has been removed and the function has been deleted from the communicators (ticket [#6049](#))
- The resource configuration value "`ssh`" has been changed to "`pk_ssh`" (ticket [#6051](#) and [ticket:6082#comment:1](#))
- The resource configuration key "`cloud`" has been changed to "`cloud_provider`" (ticket [#6056](#) and [ticket:6082#comment:2](#))
- The command `drm4g conf` now works properly (ticket [#6060](#))
- The resource configuration key "`node`" has been changed to "`instances`" ([ticket:6082#comment:3](#))
- The DRM4G package "`fedcloud`" has been renamed to "`rocci`" ([ticket:6082#comment:4](#))

Other resolved issues

[#6003](#)

More than one resource can be defined with the same name

[#6007](#)

Cloud use cases

[#6057](#)

The Installing Extras section on Installation Wiki needs a review

[#6081](#)

Discuss the use of Libcloud

[#6085](#)

Remove all version author revision tags in `.py` files

Known bugs

- The DRM4G doesn't work properly if all of the loggers and handlers are set to level "`DEBUG`" (ticket [#6084](#))
