## How to use MACC facilities

### Login

To start working at MACC you need to login to one **ui.macc.unican.es**, which is the User Interface of MACC.

Login to ui.macc.unican.es is done via Secure Shell network protocol (ssh):

```
ssh <userid>@ui.macc.unican.es
```

where <user id> stands for your login name provided by the supervisor:

```
gabsw  
jorgesw  
melisw
```

### Storage management

The MACC utilizes a storage approach on based:

- HOME (100 GB per user) is the file system you log into, it is backed up and should be used to store source code, scripts, and important results.
- WORK file system, /oceanogihc/ is project based and provides disk space for large amount of data.

```
[user@localhost ~] tree /oceanogihc/  
/oceanogihc/  
??? gabsw  
??? jorgesw  
??? melisw  
??? work
```
