

FAQ

Through this page we will try to answer the most common questions about WRF4G.

What you should do if you see the errors below

If you execute `wrf4g_submit` and see this error. You probably has GridWay in **Stopped status**:

```
[user@mycomputer~]$ wrf4g_submit -e test
connect(): Connection refused
FAILED: failed connection to gwd
```

In order to solve the problem, you have to first check out the `wrf4g_framework` status.

```
[user@mycomputer~]$ wrf4g_framework status
GridWay Stopped
MySQL Stopped
```

Then you have to execute:

```
[user@mycomputer~]$ wrf4g_framework start
Starting GridWay..... OK
Starting MySQL..... OK
```
