

If you are a Subversion user in Windows, it may be you would be interested on these tools

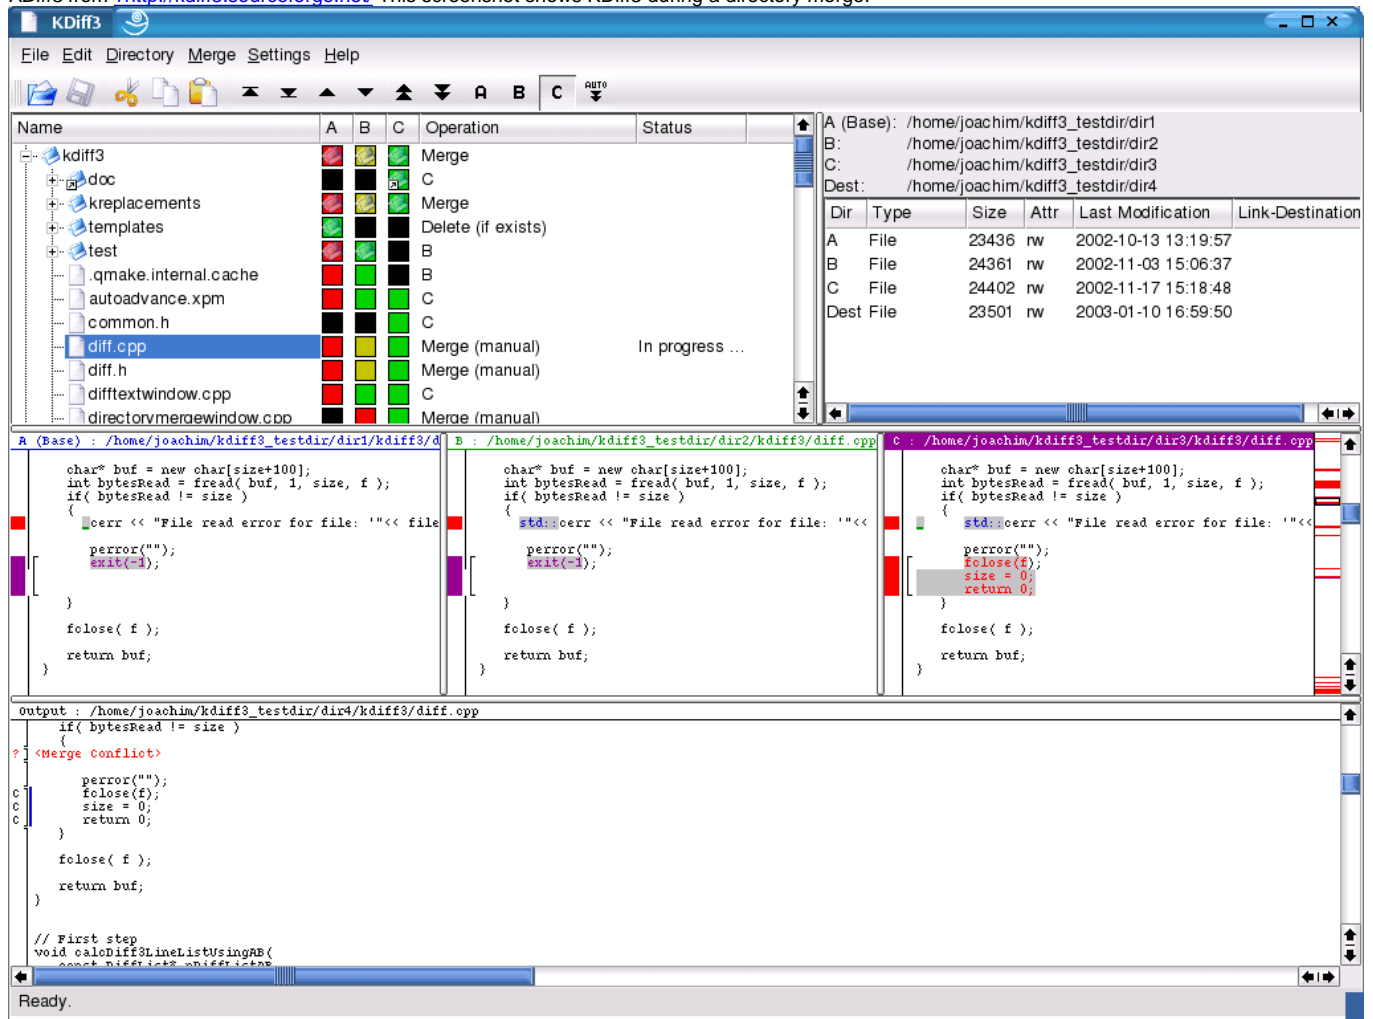

- **The TortoiseSVN:** TortoiseSVN is an easy-to-use SCM / source control software for Microsoft Windows and possibly the best standalone Apache? Subversion® client there is. It is implemented as a Windows shell extension, which makes it integrate seamlessly into the Windows explorer. Since it's not an integration for a specific IDE you can use it with whatever development tools you like.. You can download TortoiseSVN from <http://tortoisesvn.net>

Be Different, my friend, and Merge the Conflicts

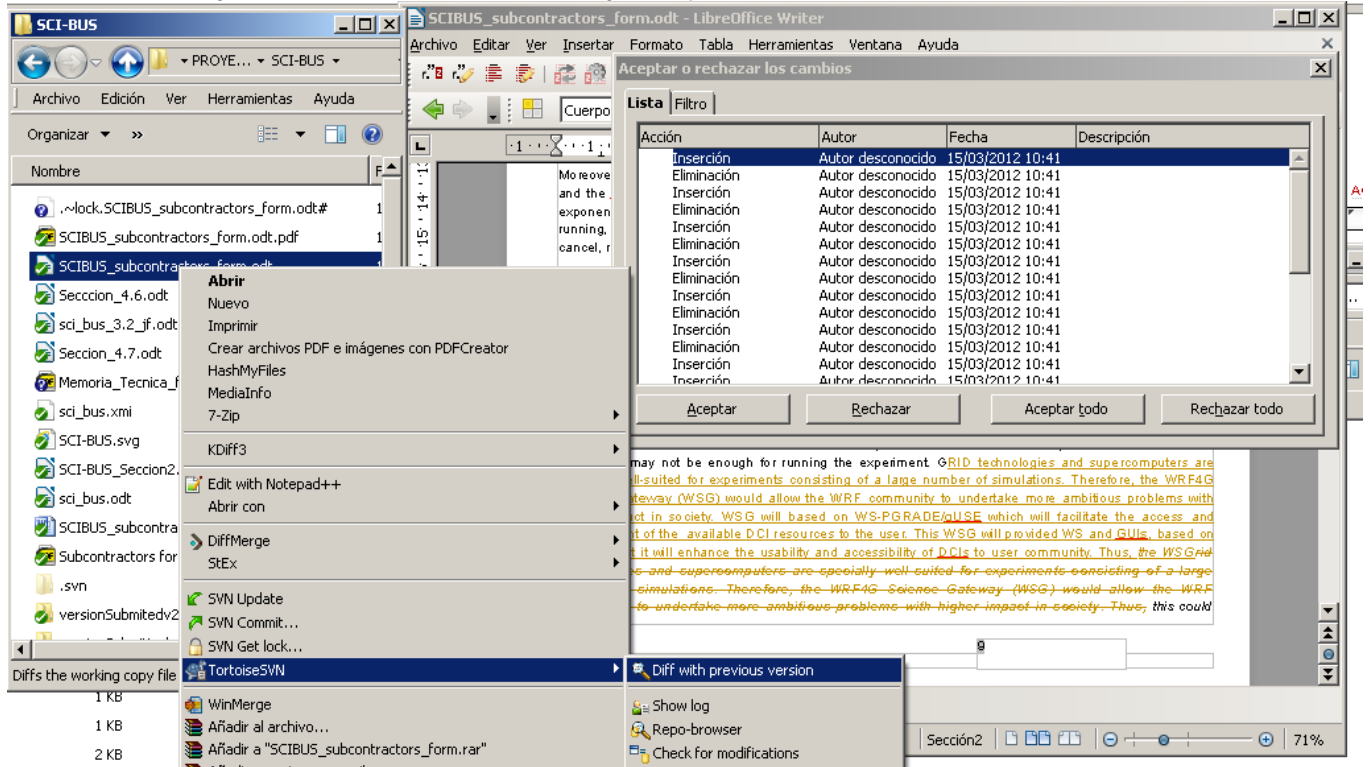

The WinMerge tool: WinMerge is an Open Source differencing and merging tool for Windows. WinMerge can compare both folders and files, presenting differences in a visual text format that is easy to understand and handle. Download WinMerge from <http://winmerge.org/>

WinMerge 3 will be modern compare/synchronization tool. It will be based on Qt library and cross-platform. You can use the same tool in Windows and in Linux.

- **The KDiff3 tool:** Compares or merges two or three text input files or directories. Is a cros platform tool for Windows an linux. You can download KDiff3 from <http://kdiff3.sourceforge.net/> This screenshot shows KDiff3 during a directory merge:

- *The Tortoise Office integration: Tortoise SVN comes with some integratio for your favourite Office tools like Writer or Calc*

- **The Subversion CommitMonitor:** *The CommitMonitor is a small tool to monitor Apache? Subversion® repositories for new commits. It has a very small memory footprint and resides in the system tray. Download CommitMonitor from <http://tools.tortoisesvn.net/CommitMonitor.html>*

The fancy Snarl: *If you have Snarl installed, CommitMonitor automatically uses Snarl to show its popups. Download Snarl from <http://www.fullphat.net/>*
