Only registered users can access the data stored in the THREDDS Data Server. Data access is constrained by the different user's roles. In this case, in order to access the SPECS/EUPORIAS climate datasets, the role *euporias* is required.

In order to obtain a user account, first go to the ?registration panel and fill in all the information required:

After successfully registering, a confirmation link is sent to the e-mail address provided.

Then, in *My Enrolments* panel, the role *euporias* must be selected. An agreement window will appear that must be accepted before saving.

After saving, the THREDDS administrator will receive the application of enrolment in *euporias*. The decision of acceptance (or rejection) will be sent by e-mail to the user's address. Once the role *euporias* is assigned to the user, he/she will be able to explore and download the SPECS/EUPORIAS datasets.
