Registration in ECOMS-UDG is done through the UDG THREDDS Administration Portal [?UDG-TAP](#). After registration, users have to request membership in one of the following groups: EUPORIAS, SPECS or NACLIM. Note that these three groups provide access to the same datasets (the common datasets for ECOMS) so membership in more than one group is not recommended. **Membership is moderated** (by the corresponding project leaders) so registration with an institutional email address is required. The process may take some time (one day on average) and results are always communicated via email.
